

Management By Projects: A Portfolio Approach

1 Day Seminar

Seminar Overview

This hands-on seminar is developed for experienced project managers, coordinators or leaders who are responsible for the timely delivery of products and/or services. The Seminar's case study and exercises stimulate a project management environment which consists of concurrent, multiple projects in a cross-functional resource (i.e. matrix) environment. This seminar is designed to provide advanced, proven, and practical tools/techniques to individuals who are tasked with managing a portfolio of projects or programs. It is based on the concept of the organization's management by projects, requiring a quantifiable decision making process and utilizing a structured planning approach to deal with the inevitable shifting of resources and funds in response to ever-changing business needs.
